## Response to Arguments

1. Applicant's arguments filed 07/20/05 have been fully considered but they are not persuasive.

- 2. As per remark on pages 3-4, Applicant argues that Chan fails to teach or suggest claim 1. However, as cited in the rejection dated 04/22/05, it is clearly that Chan discloses all the features in claim 1 completely.
- 3. As per remark on page 4 2<sup>nd</sup> paragraph, Applicant argues that Chan fails to teach "a special communication path that directly connects the program distribution device and the tamper resistant processor. Nevertheless, as cited Col 9 lines 50-60, it is clearly disclose the feature. The secure processor is the tamper resistant processor, and the program distribution device is the central station. The special communication path is the communication link 448.
- 4. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., <u>dedicated</u> special communication path (On page 4 2<sup>nd</sup> paragraph)) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).
- 5. Therefore, the rejection basis dated 04/22/05 is maintained.
